Center for Alzheimer's and
Related Dementias

Master's of Professional Studies in Data Science Fellowship

The NIH Center for Alzheimer's and Related Dementias (CARD) at the National Institute on Aging (NIA) and the National Institute of Neurological Disorders and Stroke (NINDS) is offering a unique, research-intensive master's level fellowship program to build a stronger, more diverse and inclusive community in biomedical data science.

The goal of this program is to cultivate the next generation of data science and bioinformatics professionals at CARD. Fellowship awardees will:

- Earn a paid master's degree through University of Maryland Baltimore County

- Gain foundational knowledge in data analysis and data management through the FAES-UMBC MPS program

- Collaborate and conduct interdisciplinary research with experts in the field at CARD
