

DESERT WISE

Raising the bar for healthy workplaces and professional self-care

We are seeking full-time mental health therapists to join our team in-person, remote, or hybrid, and we welcome both independently licensed providers and pre-licensure supervisees of all credentialing types.

Desert Wise is an Albuquerque psychotherapy clinic that provides culturally competent care to and advocacy for military members, veterans, and those who love them. We also regularly treat medical professionals, attorneys, aviators, and other individuals in high stakes occupations. Desert Wise specializes in PTSD, C-PTSD, and their sequela, so a passion for treating trauma is required.

Alongside excellence in patient care, Desert Wise emphasizes a safe, humane work culture for clinicians, and a candidate's equanimity and ability to integrate healthily into this environment is essential. Our team is a sanctuary for learning, stumbling, and developing, and we hold ourselves to high standards of introspection, self-awareness, and accountability. Therefore, we are seeking candidates that are a good fit with and will be good stewards of this dynamic.

Desert Wise treatment is largely informed by a psychodynamic perspective, but psychodynamic orientation is not required. More broadly, we value skilled, clinically informed integrative approaches that flex based on the needs, preferences, and cultural contexts of the patient sitting in front of us.

In addition to fulfilling patient care and a dignified work environment, we offer:

- Competitive pay
- Medical, dental, vision, and life insurance
- Paid sick time
- Free weekly individual and group supervision for pre-license clinicians
- Malpractice insurance
- Flexibility to work in-person, remotely, or hybrid
- Autonomy to set your own schedule
- Humane, manageable caseloads (*FT ≥ 20 face-to-face clinical hours per week*)
